

## Instapak<sup>®</sup> Foam Packaging

### SIMPLE FACTS ABOUT FOAM-IN-PLACE PACKAGING AND THE ENVIRONMENT

The cushions protecting this product are made of Instapak<sup>®</sup> polyurethane packaging foam, a material that minimizes the amount of packaging used without compromising the protection of shipped goods. Instapak<sup>®</sup> packaging complies with international legislation restricting the presence of heavy metals.

#### Source Reduction

Instapak<sup>®</sup> foam has superior cushioning abilities that provide maximum protection with a minimum of material. Less packaging is used, so less enters the waste stream.

#### Reuse

Instapak<sup>®</sup> foam cushions can be reused for multiple shipments or reshaped manually into carton fillers to fit the next product shipped.

#### Waste-to-Energy

In those communities where Waste-to-Energy (WTE) incineration facilities are available, Instapak<sup>®</sup> provides a positive waste-to-energy contribution.

#### Landfill Compatibility

Instapak<sup>®</sup> cushions can be disposed of with ordinary waste. Highly compressible, they occupy only 10% of their original volume in a landfill. Instapak<sup>®</sup> foam is biostable. It will not degrade and contribute to air or water contamination.

#### Instapak<sup>®</sup> Foam Return Program

Instapak<sup>®</sup> foam can be returned to the sites listed on the reverse side of this card,

**Attn: Foam Return Program.** Please send the cushions prepaid (COD's will not be accepted). If you prefer to drop the material off, please call the site in advance and ask for the Foam Return Coordinator.

Instapak<sup>®</sup> foam may be bagged, baled or boxed. The foam must be clean, dry and not adhered to any corrugated cardboard material.

Using Instapak<sup>®</sup> foam to protect products makes good environmental sense. For more information about Instapak<sup>®</sup> foam, please call Sealed Air's toll-free general environmental information number:
